

# Zoning & Wayfinding

Designing with modules

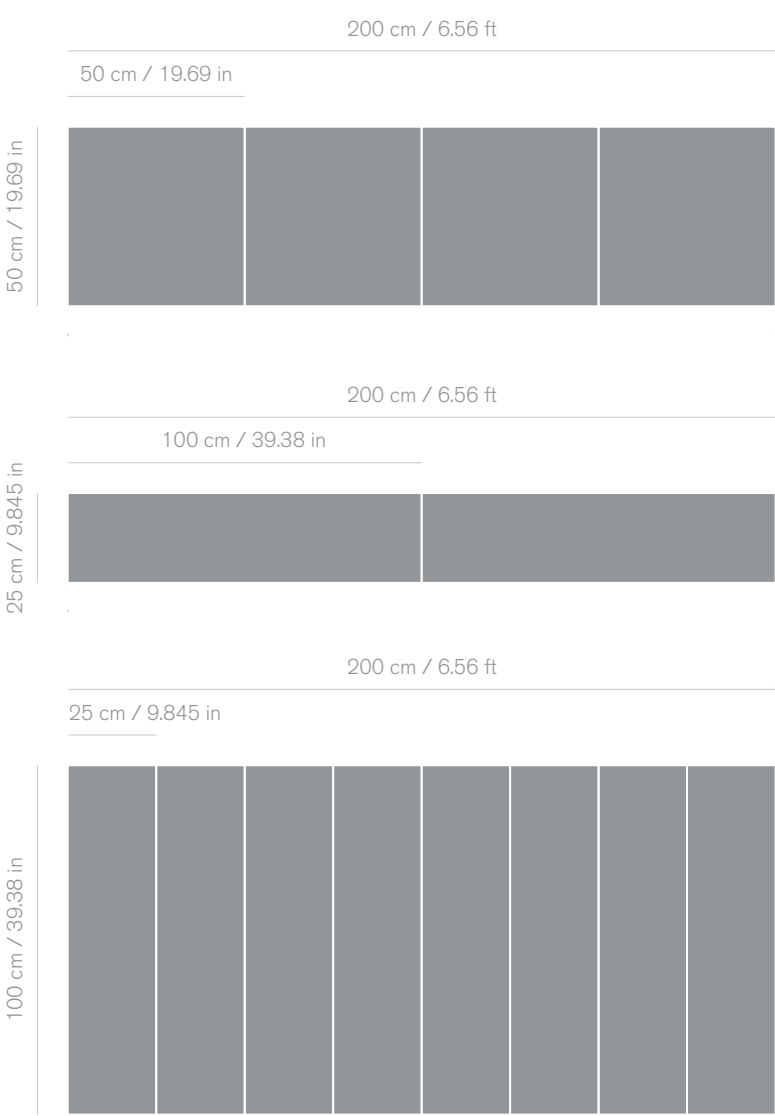

Interface®

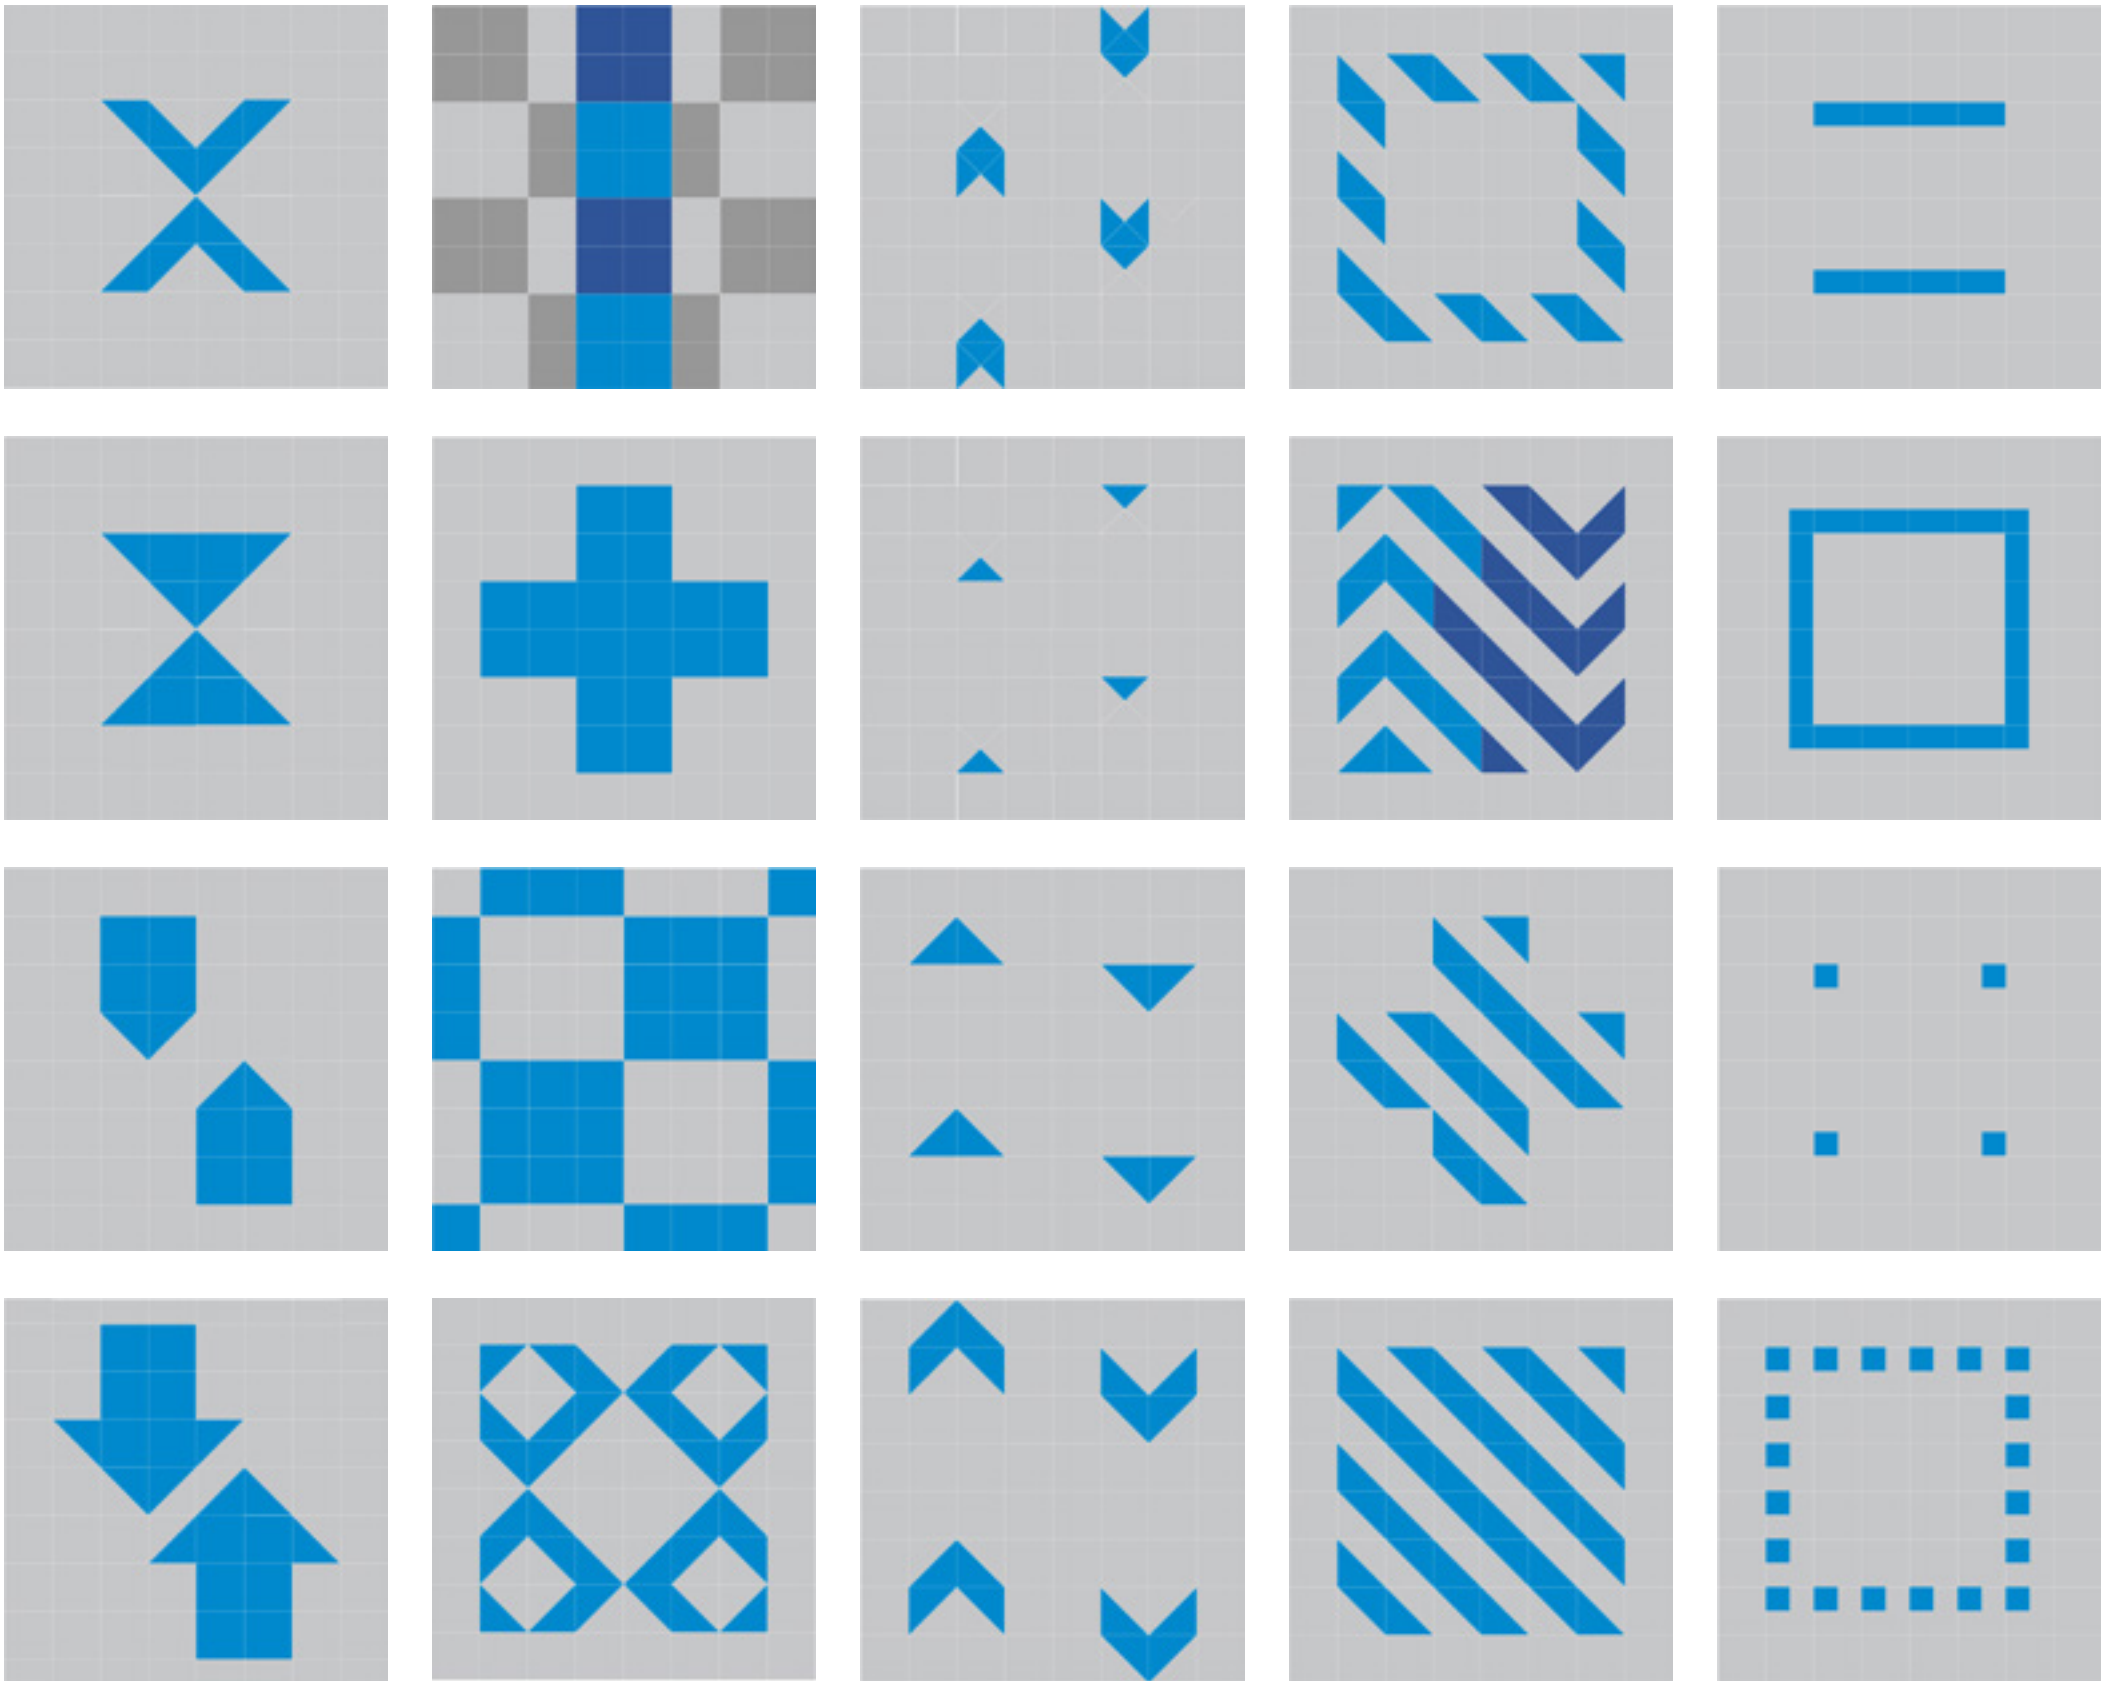

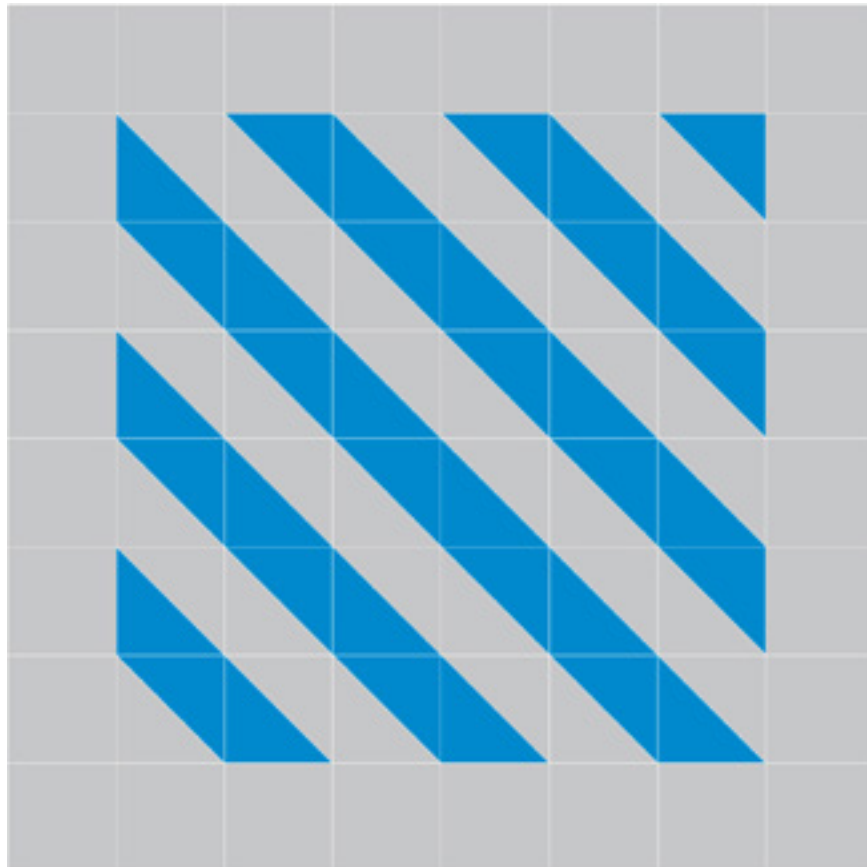

# Post COVID-19 workspace

By using our modular shapes and dimensions you can create a clear and graphic zoning in your building. With simply half cut tiles it is possible to expand the options and create a directional flow on the floor. The Zoning and Wayfinding patterns find their inspiration in pavement, signage, and mosaic you could find on the streets and squares of our city's and in natural stone floors within classical buildings. The variety in pattern and rhythm of tiles will guide us through our buildings and make us understand where to walk and be.
